

## DYE UPDATE

The **R44 Trainer Helicopter** is flying again after the 2200hr/annual overhaul which Larry just performed and signed off. Larry and Ryan laid out the new paint scheme and then painted it. Everyone seems to be impressed with it! It almost makes you want to fly it! Larry is glad to have that project behind him. It was a great undertaking to accomplish this goal!

**Reaching the remote tribal locations with the Gospel of Jesus Christ takes a team effort!**

**Alicia graduates from high school this May! She will soon be off to Grand Canyon University.**

**Alicia** plans to study Business Management at a Christian college. PTL she has received two local scholarships so far which will be of great financial help. She will be greatly missed but we're thankful the drive to Phoenix is only 4 hours. Please pray for her as she steps out into this new phase of life.

**Mini DYE reunion** to celebrate Paul & Pat's 50th Anniversary...WOW Thank you Lord! It was great to see mom and dad renew their vows to each other. 50 years places a whole new perspective on things for being faithful to each other! Luke's whole family, Lisa, Kristine & Lee came and we put on a great Celebration! It had been 3 years since our families had been together!

After a risky landing and dangerous ocean trip to inspect a newly built airstrip, pilots Daren Spence and Nathan Tag landed the **Kodiak** on a remote Asia-Pacific island. At last the missionaries can fly straight to this group of tribal believers. Instead of 2 to 5 days over land and treacherous ocean waters, the Kodiak can make the trip in 2 hours with everybody and all the supplies!

As Nathan and Daren did landings and takeoffs on the new strip, they invited the two tribal men who had coordinated the airstrip endeavor to fly with them. "Neither of these men had ever been on an airplane before and, getting off the airplane later, they were all smiles," wrote Daren. Would you pray with us: "Thank you, Lord, for your provision of this airstrip and the Kodiak." May your people in the surrounding villages grow strong as the missionaries bring much-needed teaching and discipling.

It is always satisfying to hear positive results of the operation of the Kodiak for the missionaries and the tribal churches, remembering how Larry has worked long hours installing the modifications and mounting the cargo pod before it departed for overseas. We are grateful for the role we can share in reaching the unreached! Thank You for being such a huge part in our ministry and for making it possible for us to continue serving the Lord in this capacity here at NTM Aviation, McNeal AZ.
