

FEBRUARY 14TH ,2014

This is the day of love and am taking this opportunity to write and tell you that Paul and I love you and thank God for putting you into our lives! You have been such a blessing to us, both spiritually and materially down thru these many many years! Please know you mean so very much to us! Tho we don't need Valentines Day to tell you that, we will use this day to send our loving greeting to you!

Paul is preparing to leave for an 8 day stay in Bolivia, S.A. He has been asked to speak to a group of about 1000 or more Pastors in Spanish! So He is busy practicing his Spanish in whatever way possible! Reading the Spanish Bible, praying in Spanish...etc... I know God will help him and this stress will soon pass away I trust for my dear Husband. Paul will also be sharing in several of the churches there in the area...So I am asking you to please pray for him as he leaves me on the 17th Of February and goes to be used of God there! He will be speaking as well about the history of New Tribes Mission in that country when his own Father and Mother went down to the mission field along with Paul and his two older sisters and the other families in 1942. After much preparation and permission from the military and government, his Dad and 4 other men made the trek into the jungle to reach a primitive group of people called the Ayore. There is a plaque in the town of Robore, dedicated to the five men who gave their lives that the Gospel could get to such people. Paul never knew his dad, but has followed his example indeed!

Pray for me as I'll be staying home alone and praying for my man! I will appreciate that very very much! Thank you!

Pray for NTM Aviation in these days as there are many changes going on in the area of mission aviation. It is costing many dollars to just fly in some of our countries because of the fuel expense. We are trying to begin a type of subsidizing to help with the cost so that our missionaries and native people can
