Hope for the Hurting

All of us have to deal with crises in our lives and sometimes, the reality of life can seem unbearable. But we can rest in the knowledge that God loves us, He weeps in our time of pain and He can be glorified through our suffering. Randy Gevermuehle comes to us from a very scarred and violent past. The effects of which haunt him daily. He was severely tortured by a schizophrenic mother through the tender age of 15. A High School teacher introduced him to Jesus and he found the hope and faith to make it through high school and college. Today, he suffers from seizures from brain scarring which hinders his ability to find employment. Randy views his past hurts as blessings in that "when we pray for change, we may not get it, but it may be because we will use it to witness to others later."

Hope is a happiness that is held in the heart when happiness seems to be gone.

Hope is a quiet joy deep within, encouraging us to go on.

Hope is a guide when we seem to be lost that can help us in finding our way.

Hope is a strong, immovable force that our doubts and our fears cannot sway.

Hope is a light that burns in the night in a place where a miracle starts, and every good thing will come in its time...

As long as there's **hope** in our hearts.
